

# Accu Flo™ Additive Meter System

MAXAM's Accu Flo™ System is the only system available capable of adding viscous additives accurately without heating the additive tank.

## Advantages:

- Save on energy costs - no need to heat the additive tank
- Heats only the metered additive
- Handles the most viscous additives
- Integrates with existing plant controls
- Installs easily - comes fully assembled in a steel, skid-mounted enclosure

## Features:

- Positive displacement, variable speed pump
- Coriolis mass flow meter for accuracy
- High efficiency demand-style inline heater
- On-board controls
