

Flo-Blaster™ Raptor Recycle System

Flo-Blaster™ technology eliminates plugging and bridging when conveying RAP or RAS. Numerous air cannons, strategically positioned on all sides of the bin, maintain a consistent flow of material. Each cannon fires in rapid succession breaking up any slugs, plugs or bridging to ensure a consistent flow.

Features:

- Prevents plugging, bridging and inconsistent flow of RAP and RAS
- Numerous air cannons positioned strategically on all sides of the bin
- Fires shotgun blasts of high pressure air in rapid succession
- Fires automatically when “no-flow” switch is activated
- Can be retrofitted on any bin and is standard on all Maxam Raptor® recycle bins
